Screenshots:

In this screen shot we have the form first part of the code where we were able to make the code design do what we need.

In this form we have the design we made in our form design it's just the that gets built when we make changes to the form.

This last screenshot shows our store design.

Flowchart:

This flowchart shows and walks you to making the code by walking us through how and why we made each dissention

Problems I want through in the forms code: I was stuck on a part where I was calculating the answers needs when we entered a number, but I would get a error I didn't know why tell I saw that the format was done incorrectly I fixed the format and the code worked.
